Grade Point Average Calculation: A student's GPA is calculated by dividing the sum of earned points by the sum of attempted hours for all the courses receiving a grade used in calculating the GPA. Transferred, withdrawn, forced withdrawn, audit and 0 credit hour courses are not included in the calculation.

Repeated Courses: In the case of a failed course, the student must repeat the core course/s or take another one in case of elective course/s. In the case of improving the course grade, the student may repeat any number of courses to improve the CGPA. The highest grade will be calculated.

Education

Alamein International University — AIU Graduated Jun 2025
BSc. in Computer Engineering - Artificial Intelligence Engineering Program (GPA: 3.58 / 4.00) *New Alamein City, Egypt*

Technical Skills

Programming Languages: Python, Java, JavaScript, C, PHP, R
Technologies: PyTorch, TensorFlow, FastAPI, Hugging Face, Keras, Scikit-learn, LangChain, LangGraph, n8n, Azure, Laravel, Bootstrap, Vercel, Groq API, ROS, Gazebo
Concepts: Deep Learning, Computer Vision, NLP, Prompt Engineering, AI Conversation Design, RAG, Fine-Tuning Techniques, LLM Applications, Agentic AI, Workflow Automation, Cloud Computing
Languages: Arabic, English (B2), Chinese (HSK 1)

Experience

Teaching Assistant (Part-Time) Mar 2026 – Present
Alamein International University — AIU *New Alamein, Egypt*
- Delivering tutorials and supporting students in Internet of Things (IoT) and Embedded Systems courses.
- Assisting in lab sessions, explaining core concepts, and guiding students in practical implementations.

Backend Developer June 2025 – Jan 2026
Alex Apps Software Solutions *Remote – Alexandria, Egypt*
- Assisting in the development of scalable backend services using Laravel framework and RESTful APIs.

Machine Learning Engineer Intern April 2024 – Oct 2024
Ministry of Communications and Information Technology (MCIT) - Digital Egypt Pioneers Initiative *Remote-Alexandria, Egypt*
- Worked on deep learning, Computer Vision, NLP, cloud computing with Azure.
- Developed NLP and Computer Vision models and deployed them using MLOps practices.

Exchange Program Participant Jul 2024 – Aug 2024
Shanghai University Summer School Program *Shanghai, China*
- Participated in a Chinese language course, lecture series, and cultural practices to experience and understand Chinese culture.

Backend Developer Intern Jul 2023 – Sep 2023
IT Department at AIU *New Alamein, Egypt*
- Developed an Academic Program Management System using PHP and Laravel to support ABET accreditation.
- Implemented functionalities for managing programs, courses, assessments, and accreditation outcomes.

Cloud Solution Engineer Intern Jul 2023 – Oct 2023
DigiTech, a Noventiq company *Cairo, Egypt*
- Led the migration from on-premises data centers to the cloud using the Azure Landing Zone Adoption Framework.
- Optimized cloud infrastructure by implementing Azure DevOps for continuous integration and delivery (CI/CD), reducing deployment time by 30%.

Selected Projects

SEKMED – AI-Powered Digital Healthcare Platform (Graduation Project) | *LLaMA 3.3, Groq LLM, Pinecone, Fitbit API, Google Maps API*
- Developing an AI-driven digital healthcare assistant as a graduation project, designed to enhance diagnostic accuracy, personalization, and medical accessibility.
- Leveraging LLaMA 3.3 and Groq LLM with conversational-style prompting and many-to-many shot examples to improve contextual understanding and medical reasoning.

Precision Agriculture Drone – Crop Disease Detection | *ROS, Gazebo, Python, YOLOv8, OpenCV*
- Simulated an autonomous UAV in Gazebo using ROS to perform aerial crop monitoring over virtual agricultural fields.
- Integrated a YOLOv8 object detection model with an onboard camera feed via OpenCV to identify and localize diseased crop regions in real time.
- Designed ROS nodes for flight path planning, image capture, and detection result publishing across the ROS topic architecture.

Chatbot for Automated Q&A | *Python, TensorFlow, BERT, NLP*
- Developed and deployed a chatbot using BERT, a state-of-the-art natural language processing model, to provide accurate and relevant answers to user queries.
- Fine-tuned BERT on the SQuAD dataset, optimizing the model for context-aware responses.

Facial Emotion Detection | *Deep Learning, CNN, Python, OpenCV*
- Implemented a Convolutional Neural Network (CNN) to detect facial emotions from images.

Microservices-Based Translation and Summarization Platform | *Python, FastAPI, Flask, Django, Node.js, React, Kafka, Docker*
- Developed a modular microservices architecture for text translation (English-Arabic) and summarization.
- Utilized FastAPI, Flask, and Django with Hugging Face Transformers for NLP tasks.

House Price Prediction | *Neural Networks, Python, Regression*
- Developed a Neural Network model to predict house prices using regression techniques on the Ames, Iowa dataset.

Publication

Mindful Muscle: Empowering Student Wellness and Success with AI Gym Coaching. Presented at the *First International Conference on Universities and Artificial Intelligence Technology*, June 24–25, 2024.

Volunteering

Logistics and Administration Volunteer – UCCD, Alamein International University: Supported career development programs and helped students enhance their career readiness.

Volunteer Organizer – World Cities Day 2024, UN-Habitat, Alexandria: Assisted in organizing and coordinating event activities for World Cities Day.
