Education

Alexandria University — Faculty of Engineering Sep 2026 - Present
M.Sc. in Computer Engineering *Alexandria, Egypt*

Alamein International University — AIU Graduated Jun 2025
BSc. in Computer Engineering - Artificial Intelligence Engineering Program (GPA: 3.58 / 4.00) *New Alamein City, Egypt*

Technical Skills

Programming Languages: Python, Java, JavaScript, C, PHP, R
Technologies: PyTorch, TensorFlow, FastAPI, Hugging Face, Keras, Scikit-learn, LangChain, LangGraph, n8n, Azure, Laravel, Bootstrap, Vercel, Groq API, ROS, Gazebo
Concepts: Deep Learning, Computer Vision, NLP, Prompt Engineering, AI Conversation Design, RAG, Fine-Tuning Techniques, LLM Applications, Agentic AI, Workflow Automation, Cloud Computing
Languages: Arabic, English (B2), Chinese (HSK 1)

Experience

Teaching Assistant (Part-Time) Mar 2026 – Present
Alamein International University — AIU *New Alamein, Egypt*

- Delivering tutorials and supporting students in Computer Architecture and Organization, Embedded Systems, and Internet of Things (IoT) courses.
- Assisting in lab sessions, explaining core concepts, guiding students in practical implementations, and using CANVAS for course management.

Backend Developer Mar 2025 – Feb 2026
Alex Apps Software Solutions *Alexandria, Egypt*

- Assisting in the development of scalable backend services using Laravel framework and RESTful APIs.

Cloud Solution Engineer Jan 2024 – Feb 2025
DigiTech, a Noventiq company *Cairo, Egypt*

- Led the migration from on-premises data centers to the cloud using the Azure Landing Zone Adoption Framework.
- Optimized cloud infrastructure by implementing Azure DevOps for continuous integration and delivery (CI/CD), reducing deployment time by 30%.

Selected Projects

SEKMED – AI-Powered Digital Healthcare Platform (Graduation Project) | *LLaMA 3.3, Groq LLM, Pinecone, Fitbit API, Google Maps API*

- Developing an AI-driven digital healthcare assistant as a graduation project, designed to enhance diagnostic accuracy, personalization, and medical accessibility.
- Leveraging LLaMA 3.3 and Groq LLM with conversational-style prompting and many-to-many shot examples to improve contextual understanding and medical reasoning.

Precision Agriculture Drone – Crop Disease Detection | *ROS, Gazebo, Python, YOLOv8, OpenCV*

- Simulated an autonomous UAV in Gazebo using ROS to perform aerial crop monitoring over virtual agricultural fields.
- Integrated a YOLOv8 object detection model with an onboard camera feed via OpenCV to identify and localize diseased crop regions in real time.
- Designed ROS nodes for flight path planning, image capture, and detection result publishing across the ROS topic architecture.

Chatbot for Automated Q&A | *Python, TensorFlow, BERT, NLP*

- Developed and deployed a chatbot using BERT, a state-of-the-art natural language processing model, to provide accurate and relevant answers to user queries.
- Fine-tuned BERT on the SQuAD dataset, optimizing the model for context-aware responses.

Facial Emotion Detection | *Deep Learning, CNN, Python, OpenCV*

- Implemented a Convolutional Neural Network (CNN) to detect facial emotions from images.

Microservices-Based Translation and Summarization Platform | *Python, FastAPI, Flask, Django, Node.js, React, Kafka, Docker*

- Developed a modular microservices architecture for text translation (English-Arabic) and summarization.
- Utilized FastAPI, Flask, and Django with Hugging Face Transformers for NLP tasks.

House Price Prediction | *Neural Networks, Python, Regression*

- Developed a Neural Network model to predict house prices using regression techniques on the Ames, Iowa dataset.

Publication

Mindful Muscle: Empowering Student Wellness and Success with AI Gym Coaching. Presented at the *First International Conference on Universities and Artificial Intelligence Technology*, June 24–25, 2024.

Volunteering

Logistics and Administration Volunteer – UCCD, Alamein International University: Supported career development programs and helped students enhance their career readiness.

Volunteer Organizer – World Cities Day 2024, UN-Habitat, Alexandria: Assisted in organizing and coordinating event activities for World Cities Day.

Coursera Cirtificates

Generative AI with Large Language Models from DeepLearning.AI - 16 hrs | Sep 2024

Fundamentals of Reinforcement Learning from University of Alberta - 15 hrs | Dec 2023

Machine Learning in Production from DeepLearning.AI - 11 hrs | Sep 2024

Natural Language Processing in Tensorflow from DeepLearning.AI - 23 hrs | Apr 2024

Neural Networks and Deep Learning from DeepLearning.AI - 24 hrs | Dec 2023
